

Over the years we have build up expertise to find easy, sustainable and cost-saving solutions for our customers. One solution is the SAP B2B Add-On for EDI Integrations.

What is the SAP B2B Add-On?

The SAP B2B Add-On allows to run Business-to-Business processes as part of an **existing** SAP environment or as a dedicated B2B integration hub. The Add-On enables customers to establish a **free** EDI connections with business partners without using external EDI providers.

B2B Add-On Implementation

Technical capabilities

EDI standard message types

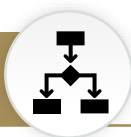

- EDIFACT
- VDA
- X12
